DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-5, 7, 9-11, ~~31-14~~, ~~19-24~~, ~~41~~, ~~43~~, ~~47~~, ~~51-53~~^{5r-2} are rejected under 35 U.S.C. 102(b) as being anticipated by Waalkes (U.S. Pat. No. 5,899,035).

Regards to claims, Waalkes discloses a knock-down portable partition system 1, comprising vertical posts 6, lock members 12, a rigid frame 2, facing panels 4 are removably mounted to rigid frame members 2, means for mounting having top, intermediate, bottom support brackets 5 between frame panels, a crow member 106, vertical supports 7 having a plurality of openings 21 for cable or utility wires 23, 24, bottom panels 42, a free standing member 30, a base cover 50, utility troughs 30, 31, communication lines 30, power lines 28, (see Figs. 1-13, 24-27, 33-34, Cols. 6-10).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3635

4. Claims 6, 8, 12, 15, 16, 18, 25, 42, 44-46, 54 are rejected under 35 U.S.C. 103(a) as being unpatentable over Waalkes (U. S. Pat. No. 5,899,035) in view of Nickens (U. S. Pat. No. 5,537,766).

Regards to claims, Waalkes discloses a knock-down portable partition system which comprising vertical posts 6, lock members 12, a rigid frame 2, facing panels 4 are removably mounted to rigid frame members 2, means for mounting having top, intermediate, bottom support brackets 5 between frame panels, a crown member 106, vertical supports 7 having a plurality of openings 21 for cable or utility wires 23, 24, bottom panels 42, a free standing member 30, a base cover 50, utility troughs 30, 31, communication lines 30, power lines 28 as previously described in paragraph 2.

Waalkes does not disclose expressly and specifically the left end of one of individual panel assemblies is adapted to be secured to the right end of another of individual panel assemblies.

Nickens teaches the display panel systems 10a, 10b each includes a plurality of display panels 12 which are pivotally interconnected one to the other. (See Figs. 1, 2, Column 3, 62-67, Column 4, lines 1-3). At the time of the invention, it would have been obvious to a person of ordinary skill in the art to combine Waalkes with Nickens. The motivation for doing so would have been to provide a horizontal connection for panels.

Allowable Subject Matter

5. Claims 17-18, 48-50, 55-56 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art fail to disclose or render obvious the claimed combination including the crown member having

an upper, lower angled, an inclined clamping surface, an up-mount and down bracket
as specifically set forth in the claims.
